### Noble Fire

Noble Fir is a special furniture creation made - as the name suggests - of fir wood. Firs are conifers, just like spruces, pines or larches. The structure of this extraordinary design is striped and planked. A light brushing generates a wonderful 3D-effect, which can be further enhanced by the accompanying haptic cylinder. Noble Fir is an authentic and timeless design. It impresses with its naturally elegant look and is ideal for combination with metal and stone decors and concrete.

**Characteristic:** Fir, striped, planked, light brushing, 3D-effect

**Application:** Home furniture, kitchen, bathroom, office

# Grimspound

## TECOPRINT

Decor reference: 10-011408

Color reference: 12034471

Application: surface-furniture, kitchen, bathroom, caravan, door, panels

Our Grimspound design has been named after a magical place located in Southern England – in the midst of the mysterious landscape of Dartmoor. Grimspound presents an original moorland oak with peaceful elegance and light planking effect. The meticulously detailed separation permits very bright and conversely extremely dark colour compositions. Particularly in dark versions, this decor has a striking nobility. A hint of diagonal bars and the striations inherent in the decor generate an appealing structure. Grimspound impresses with an understated play on colour and is ideal for combination with uni-colour and metallic surfaces. An attractive design for creating individual furniture.
