we create.  
we innovate.

NEW from  
SURTECO

## Lanata

Lanata's special veneered material gives it a high-quality finish. Its balanced, laid-back style makes Lanata really stand out. The negative pores and the use of an additional haptic cylinder add extra depth in terms of look and feel. This striated oak design is ideal for any challenge thanks to its natural appearance. It can be optimally paired with solid colours and exceptional fantasy decors.

**Application:** Home furniture, kitchen, bathroom, doors

# SURTECO in China

Last month, on the 20-23rd July, we saw our products being showcased at the CBD Fair in Guangzhou.

The fair is famous for building and decoration materials in China, which is open every year in July.

Our customer E-best was participating in the fair with their panel products. 90% of the décor designs on the booth are SURTECO designs.

Find out more about our future events on our homepage.
